I have experience of programming for more than 4 years using PHP, javascript, mysql, postgres, oracle codeigniter, laravel, lumen programming languages especially for the development of microservice rest api backends, experienced in developing whatsapp and telegram chatbots. have developed a web front end project using vue js with vuex state management along with nuxt and typescript, with golang as the backend rest api. have used supporting services such as elastic, kibana, minio and socket io

PERSONAL

Date of Birth   Bengkulu, 07 November 1994

Address   Ragunan, South Jakarta

Spoken Languages   Indonesia ●

EDUCATION

Informatics Engineering

STMIK El Rahma Yogyakarta ● *2014 - 2018*

SKILL

Soft Skills

Scrum Manajement Project • Agile

Technical Skills

Git • GitHub • LaTeX • Linux • Windows • MacOS • Amazon Web Server • Docker • ElasticSearch •
Mysql • Postgresql • Oracle • Socket Io • Chatbot Whatsapp • Chatbot Telegram • Chatbot Facebook

Coding Languages

PHP • Javascript • Golang • Typescript • Python • Sql • HTML • CSS

Frameworks

Codeigniter • Laravel • Vuejs • Nodejs • Flask • Django • Odoo • Flectra

SKILL EXPERIENCE

- 4+ years of experience with programming language
- Experienced in developing chatbot ai and integrate it to various social media and text messaging such as facebook, instagram, telegram, whatsapp and twitter.
- Fluency or understanding of specific language, such as javascript
- Familiarity with RESTful APIs
- Good debugging skills
- Eagerness to learn, eagerness to share and eagerness to help
- Familiarity with Docker
- 1+ years of experience with modern front-end frameworks like Vue.js, Vuex, Tailwind css, Typescript
- Experienced in MySQL and creating performant queries.
- Familiarity with Socket Io
- Strong Knowledge web development using codeigniter and ajax
- Knowledge of distributed version control systems such as Git
- Familiarity with Elastic Search
- Good grasp of general web principals including web performance, security, responsive design & mobile constrains
- Familiarity with Nodejs
- Self-motivation and ability to work independently and asynchronously • Familiarity with ORM frameworks of python like Flectra or Odoo
- Knowledge using Oracle Database on my recent project
- knowledge of Go programming language, paradigms, constructs, and idioms.
- Popular Go web frameworks; such as Gin and echo.

WORK EXPERIENCE

FullStack Web Developer
- PT Bank Rakyat Indonesia Tbk
- 2021 - 2022
- South Jakarta, Capital of Jakarta
- Develop web-based applications for internal employees, bank bri, using vue js and golang

FullStack Web Developer
- PT Indiga Nusa Digitama
- 2021
- Bandung, West Java
- Develop a student motorcycle taxi application for web-based users using codeigniter and vue js
- Develop a web-based laundry booking application using codeigniter and vue js

Backend Developer
- PT Medika Digital Nusantara
- 2019 - 2021
- Sleman, Special Region Yogyakarta
- Develop rest api for hospital mobile application
- Develop a whatsapp chatbot for booking appointments in hospital
- Develop a telegram notification chat scheduler, for online attendance reminders, management announcements to employees and other features

Freelance Web Developer
- PT Sarihusada
- 2019
- Yogyakarta City, Special Region Yogyakarta
- Develop a website-based meeting room booking application using codeigniter

Chatbot Developer
- PT Botika Tekhnologi Indonesia
- 2019
- Yogyakarta City, Special Region Yogyakarta
- Develop Chatbot, Whatsapp, telegram and Facebook

Web Developer
- CV Sematic

- 2018 - 2019
- Yogyakarta City, Special Region Yogyakarta
- Develop a web-based booking application for building goods

PROJECTS EXPERIENCE

BRI
- Project Name : Infolelang Bri
- Project Time : 6 Month
- Responsibilities : create and develop the front page, for the front web and admin pages, which are tailored to the application flow from rest api, based on the login roles of employees in various positions and divisions.
- Tekhnology / Tools Used : Javascript, Vue Js, Nuxt Js, Vuex, Axios, Golang, Elastic Search, Rest Api, Mysql
- Year : 2022
- Link : https://infolelang.bri.co.id or http://infolelangbri.com

BRI
- Project Name : Produk Bank Baru Compliance BRI
- Project Time : 6 Month
- Responsibilities : create and develop admin pages, with user logins based on various levels of positions and employee divisions, adapted to the existing flow of Api
- Tekhnology / Tools Used : Javascript, Vue Js, Nuxt Js, Vuex, Axios, Golang, Rest Api, Mysql
- Year : 2021 - 2022
- Link : private domain

BRI
- Project Name : Whistle Blowing BRI (WBS)
- Project Time : 3 Month
- Responsibilities : help find and fix bugs major and minor from projects made by previous developers
- Tekhnology / Tools Used : PHP, Javascript, Codeigniter, Mysql
- Year : 2022
- Link : private domain

Indiga Nusa Digitama
- Project Name : CaturIndo
- Project Time : 3 Month
- Responsibilities : create and develop UI page views, and rest api for use in mobile applications
- Tekhnology / Tools Used : PHP, Javascript, Codeigniter, Mysql, Ajax

- Year : 2019
- Link : play.google.com/store/apps/details?id=com.caturindo

Indiga Nusa Digitama

- Project Name : Santri Jek
- Project Time : 3 Month
- Responsibilities : help find and fix bugs major and minor from projects made by previous developers
- Tekhnology / Tools Used : PHP, Codeigniter, Mysql, Ajax, Rest Api
- Year : 2019
- Link : play.google.com/store/apps/details?id=com.santrijek.customer

Budi Kemuliaan Hospital, Jakarta

- Project Name : Budi Kemuliaan Hospital Application
- Project Time : 3 Month
- Responsibilities : develop rest api and whatsapp chatbot for online booking registration for treatment for patients
- Tekhnology / Tools Used : PHP, Codeigniter, Mysql, Rest Api
- Year : 2020
- Link : play.google.com/store/apps/details?id=com.morbis.budikemuliaan

PKU Muhammadiyah Hospital, Sruweng

- Project Name : PKU Muhammadiyah Sruweng Application
- Project Time : 5 Month
- Responsibilities : develop rest api and chatbot, notification whatsapp realtime for online booking registration for treatment for patients
- Tekhnology / Tools Used : PHP, Codeigniter, Mysql, Rest Api
- Year : 2021
- Link : https://play.google.com/store/apps/details?id=com.mbi.sruweng
- Whatsapp Chatbot : api.whatsapp.com/send/?phone=6289628166024

Bhayangkara Hospital, Palembang

- Project Name : Bhayangkara Hospital Application
- Project Time : 5 Month
- Responsibilities : develop rest api and notification whatsapp realtime for online booking registration for treatment for patients
- Tekhnology / Tools Used : PHP, Codeigniter, Mysql, Rest Api
- Year : 2021
- Link : https://play.google.com/store/apps/details?id=com.morbis.rsbhayangkara
